

Frontend Engineer

Responsibilities

1. Implement & maintain web apps using **React**
2. Work closely with our product managers and UI/UX designers to understand feature specifications
3. Communicate with QA engineers to design and understand technical specs
4. Proactively give feedback and ask questions to contribute to product specifications' improvement
5. Work closely with backend engineers for API integration
6. Make a thing work first before make it better
7. Test driven development with unit and integration tests (no test, no merge culture)
8. UI/UX sensibility:
 - a. Intuit what users might and might not expect to see
 - b. Make smart adjustments to design specs to achieve better results
9. Proactively fix any usability issues

Requirements

1. Minimum 2 years of experience with React
2. Familiar with Redux, Sagas & Seamless Immutable, and TypeScript
3. Strong in CSS for **responsive design**
4. Experienced with TDD
5. Teamwork: "Your problems are my problems, my problems are your problems"
6. Excellent software engineering skills
7. Strong desire to learn and to grow
8. Validated ability to excel in a fast-paced development team
