

Frontend Engineer at Manabie

What we are looking for, in visual:

Your Responsibilities

- Implement & maintain web apps using **React**
- Work closely with our product managers and UI/UX designers to understand feature specifications
- Communicate with QA engineers to design and understand technical specs
- Proactively give feedback and ask questions to contribute to product specifications' improvement
- Work closely with backend engineers for API integration
- Make a thing work first before make it better
- Test driven development with unit and integration tests (no test, no merge culture)
- UI/UX sensibility:
 - Intuit what users might and might not expect to see
 - Make smart adjustments to design specs to achieve better results
- Proactively fix any usability issues
- Take ownership of responsibilities

What you should have

- Minimum 2 years of experience with React
- Familiar with Redux, Sagas & Seamless Immutable, and TypeScript
- Strong in CSS for **responsive design**

- Experienced with TDD
- Teamwork: “Your problems are my problems, my problems are your problems”
- Excellent software engineering skills
- Strong desire to learn and to grow
- Validated ability to excel in a fast-paced development team

Why us:

We are trying to bring the best experience to our members, through culture, environment and flexible working style.

- **Probation:** 2 months (100% full-time salary)
- **Location:** Nguyen Cong Tru Str, Nguyen Thai Binh Ward, District 1, Ho Chi Minh City, Vietnam

Salary

- Annual salary, paid monthly.
- Based on your experience, skills, and potential.
- Reviewed twice a year.

Holidays

- Two days off per week, Vietnamese national holidays, etc.
- 14 days Paid Leave Annually.
