  - Create **detailed**, **comprehensive** and **well-structured** test plans and test cases.
  - Design, review and execute **tests** for **backend** & **frontend** apps.
  - Identify, record, document, track & **prioritize** bugs.
- And of course, be a part of the team.

What you should have

- Be a sponge, absorb new knowledge and gain new experiences.
- Willing to learn Golang, Vue.js, React.
- Willing to learn about the mobile ecosystem.
- Willing to learn SQL databases.
- Strong ability to analyze.
- Organizational skills and attention to detail; time management skills.
- Strong collaborator, able to contribute to a variety of tasks.
- Excellent written and verbal communication skills.
- Creative and independent problem solver.
